Q alizer AG
Ruessenstrasse 6
6340 Baar, Switzerland

Head of Product (50%, with the prospect of increasing)

q_alizer AG · Zurich, Berne, Basel / Remote

About us

q_alizer™ is a batch release management platform for pharmaceutical and life sciences companies. We connect data from LIMS, QMS, MES and ERP systems and show where batch releases are getting stuck, without replacing existing validated systems. Companies at the forefront of the pharma and life sciences industry rely on us to bring QC and QA into one shared flow. With q_Pilot Studio, we bring AI agents directly into everyday quality work.

We are growing and looking for an experienced individual to take our product to the next strategic level.

Your responsibilities

- You own the product roadmap and set priorities together with management, engineering and customers.
- You analyse business processes in QC and QA and translate them into clear requirements and product decisions.
- You track the market, competitors and regulatory trends (e.g. GxP, digitalisation, AI in quality assurance) and identify opportunities for q_alizer.
- You represent q_alizer at industry conferences and events, as a speaker, a sparring partner and the face of the product.
- You work closely with customers and consistently bring their perspective into the product.

Q alizer AG
Ruessenstrasse 6
6340 Baar, Switzerland

What you bring

- Several years of experience in product management, business analysis or a comparable role, ideally in software or SaaS
- In-depth industry knowledge in pharma or life sciences, especially QC/QA, batch release or GxP-regulated processes
- The ability to structure complex processes and turn them into a clear product vision
- A confident presence in front of expert audiences and decision-makers
- Excellent English and German skills
- An independent way of working and the drive to take on responsibility in a growing company

What we offer

- A 50% part-time role to start, with the prospect of growing the role together
- Remote work, flexibly organised
- Regular offsites with the whole team
- Scale-up atmosphere: short decision paths, real room to shape things and visible impact
- A product with clear value in a demanding, regulated industry
